Children's Hospital

In Children's Hospital, the Columbus area has one of the largest, most sophisticated pediatric health care facilities in the United States.

This private, non-profit, fully-accredited hospital will serve about 170,000 children from birth through age 21 in a typical year in its emergency room, 41 specialty out-patient clinics and four community clinics.

Children's offers services in every specialty area of pediatric medicine and surgery, including a complete range of diagnostic, treatment, rehabilitative and preventative health care programs. These are provided by a medical staff of more than 450 pediatric specialists and more than 1,600 full-time employees who use the most modern child-size equipment. This staff and the hospital's modern new main building, opened just a few years ago, are the reasons Columbus Children's get patient referrals from about 85 of the state's 88 counties, from 12 to 15 other states and from two or three foreign countries each year.

Among the many specialty areas at the hospital are a 60-space intensive care unit for infants, a 12-bed intensive care unit for older children, a 14-bed major burn center, and a 44-bed infectious diseases (isolation) unit).

Children's is also very active in research and education which both support and enhance excellence in patient care.

Research is conducted under the guidance of the Children's Hospital Research Foundation, a non-profit corporation established to encourage and conduct both basic and applied research into the causes and cures of childhood diseases. Under funding from grants and private contributions, researchers have made significant progress in many areas, such as children's cancer, birth defects, cystic fibrosis, childhood nutrition and Reye's syndrome. Major emphasis is also being given to the disturbing problem of child abuse.

Since its inception in 1894, Children's Hospital has treated every child in need of health care, regardless of the parent's ability to pay.

How can the Hospital continue to follow this philosophy and still provide the comprehensive array of sophisticated health care programs that has earned Columbus Children's its outstanding national reputation? Through people such as yourselves. People, such as you, who share our philosophy that children are our most precious resource and that when children become sick or injured they deserve the best possible treatment; care that is available in a special place like Children's Hospital.

SPACE : 1999 SF AWARDS

7

Results of the first Space:1999 SF awards balloting

BEST SF FILM	STAR TREK THE MOTION PICTURE
BEST HORROR FILM	ALIEN
WORST SF FILM	BLACK HOLE

BEST TV SPECIAL EFFECTS	WAR OF THE GODS (BATTLESTAR GALACTICA)

CHARITY AUCTION

THE FOLLOWING IS A PARTIAL LIST OF ITEMS WHICH WILL GO UP FOR AUCTION IN THE CHARITY AUCTION WHICH WILL BE HELD SUNDAY.

12 assorted 1st and 2nd year Space:1999 Scripts
1 Space:1999 Trailer (Last Enemy, Space Brain, Dragons Domain, Mission of the Darrians, Testament of Arkadia)
6 Buck Rogers Scripts
80 Original Buck Rogers slides and an original movie poster
1 Mystery Box ???????
3 Hard cover Space:1999 Novels
1 UFO Promotional Book
Several red,blackand white UFO promo posters and several color folding promo booklets
1 set English sweet cigarette cards missing 1 card
1 set of 64 card Holland Space:1999 cards in original wrapper

SOME SMALLER ITEMS WILL BE AUCTIONED IN DAILY AUCTIONS. THE ARTICLES FOR AUCTION AND BID SHEETS WILL BE PLACED IN THE ART SHOW ROOM . AT THE TIME SPECIFIED FOR EACH DAYS ITEMS, THE HIGHEST BID ON THE BID SHEET WILL GET THE ITEM. THESE ARE ALL NICE ITEMS AND ALL MONEY PAYED FOR THESE ITEMS WILL GO TO CHILDREN'S HOSPITAL AND IS TAX DEDUCTIBLE.

AUTOGRAPHS AND ADDRESSES

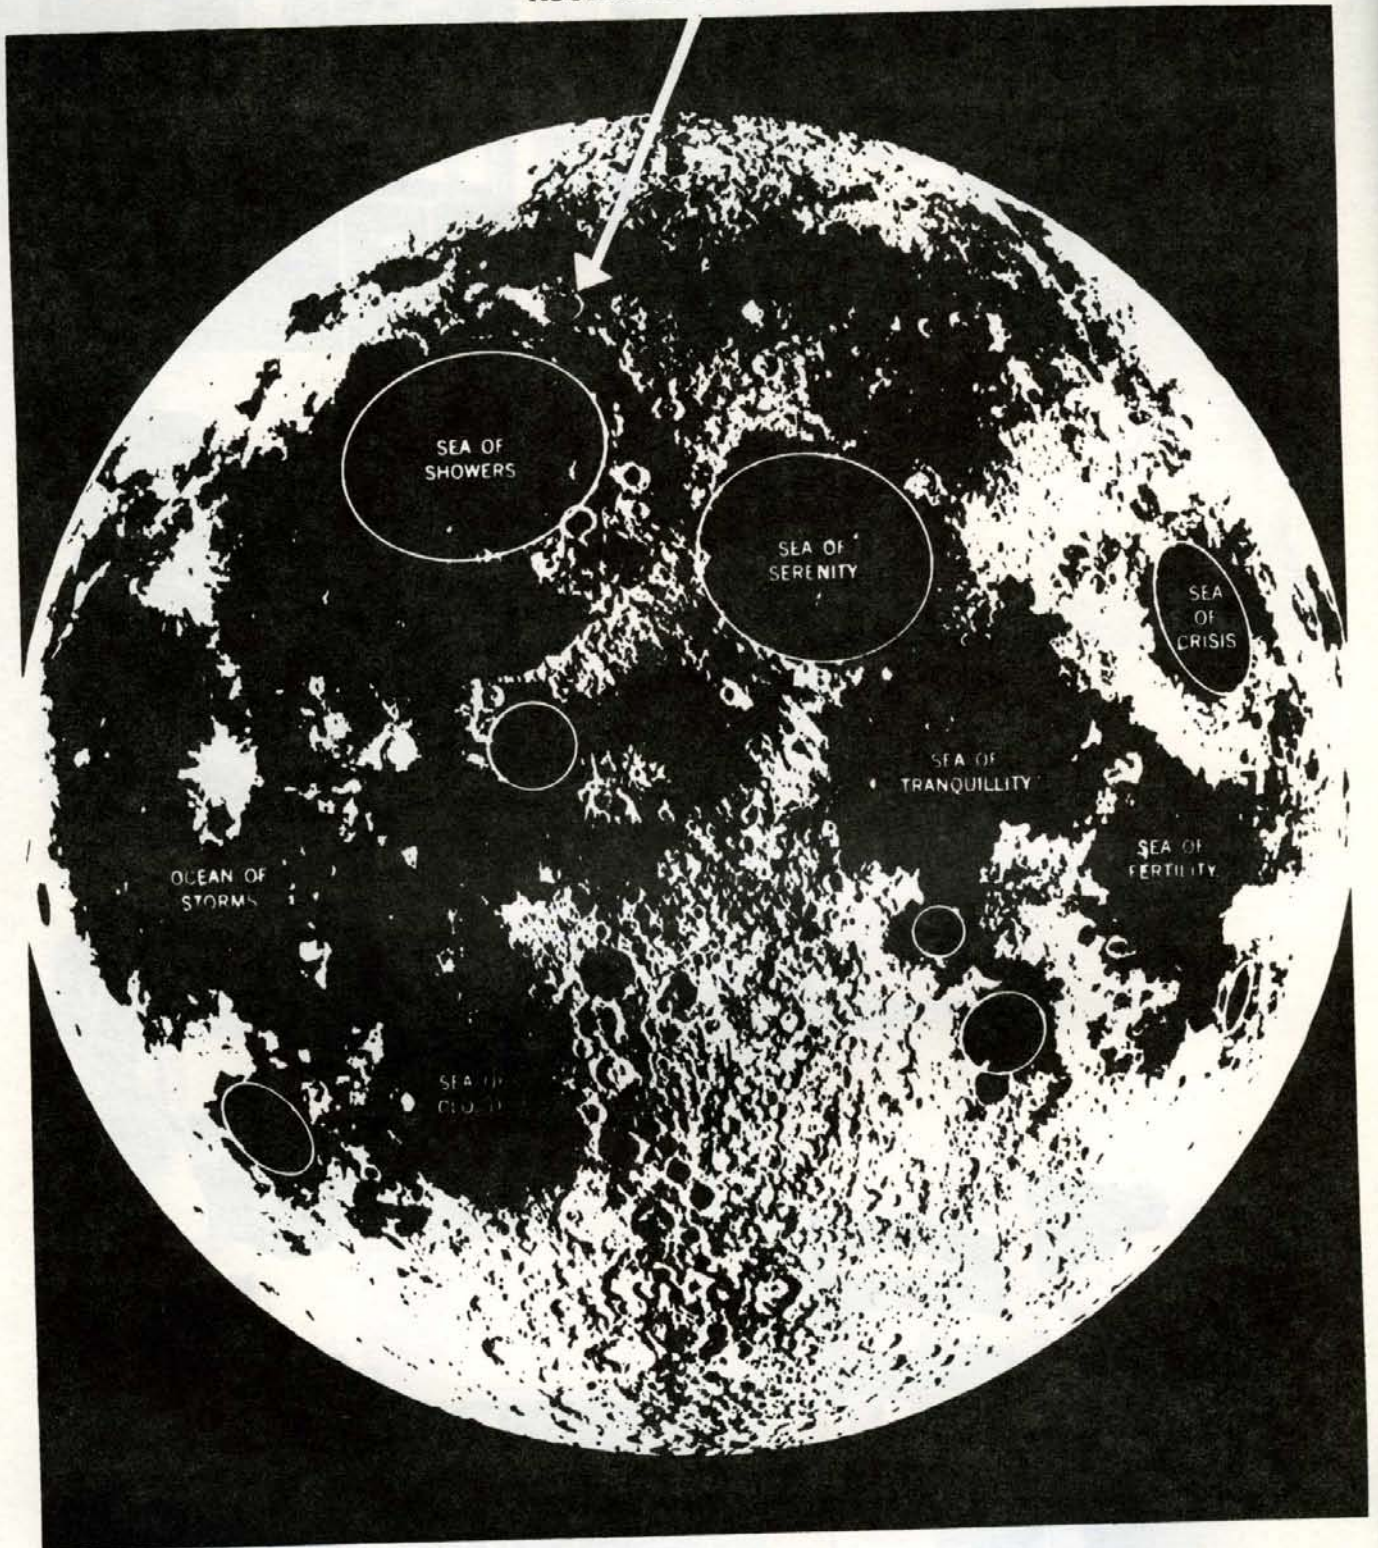

Hi again Chucks
great to see ya

Chuck

... AND NOW THE LATEST
NEWS ON THE SPACE: 1999
CON IN COLUMBUS OHIO...

Moonbase Alpha in crator Plato

BUT WERE AFRAID TO ASKWhat's the technical breakdown of Moonbase Alpha?

Moonbase Alpha is the finest collection and integration of man's greatest scientific achievements to date. Encapsulated here are all the latest advancements in the fields of Engineering, Computer technology, Medical Engineering, Architecture, Astronomy, Mass Transportation, Physics, and art.

Indeed, it is ironic that such a fine example of human endeavor should find itself adrift in the void of space, perhaps to supply some alien race with a perfect specimen of mankind at his best.

Moonbase Alpha is located in a well protected crater called "Plato", clearly visible just above the Sea of Showers, it is about 100 kilometers in diameter. The complex itself is a marvel of modern engineering. Constructed out of **a material** of melted rock and metal, it was originally meant to support 311 scientists and engineers above ground. The base is 4 kilometers in diameter and extends 1 kilometer farther in areas below the lunar surface. The major research sections break down as follows:

1. ENVIRONMENTAL SECTION

Responsible for air circulation and re-circulation, also responsible for detecting radiation or other harmful elements in the space in which the moon travels. The Environmental Section is constantly monitoring space for alien viruses by means of the thousands of bristling antennae and sensory devices located on the outside of the structure. These devices were originally meant as an early warning system for Earth, searching the heavens for any signs of extraterrestrial civilizations.

2. HYDROPONICS

Responsible for the production and preservation of many plant forms which generate life giving oxygen(the humans on the base themselves supply the carbon dioxide needed by the plants). Also responsible for the recycling of food and other spent materials. Much of the food consumed on Alpha is of a healthy synthetic origin. The food is flavored and then nutrients are added to keep the Alphans in top physical condition, as a simple case of the measles could mean the extinction of life in a sealed environment.

3. ENGINEERING and TECHNICS

Responsible for the production, re-cycling, and repair of all hardware used. Through the engineering genius of Moonbase technicians, they were able to successfully convert a transitory base on the Moon, and turn it into a permanent world. This department is certainly the most active one on Alpha since they must clear the dirty work of repairing spacecraft, repairing computer equipment, manufacturing raw materials in makeshift atomic furnaces, keep careful record of all security equipment in operation, plus feeding and nursing the three nuclear fusion reactors which keep the lights on (among other things).

4. RESEARCH SECTION

Responsible for special scientific and philosophical research into problems facing Moonbase and its inhabitants. This section, operating closely with the Engineering and Technics section, consists of physicist-philosophers who understand the structure of the universe better than any other scientist. This section will perform the experiments needed to find a planet suitable for the Alphans.

Responsible for psychological and physiological maintenance of the personnel of Moonbase Alpha. Medical facilities of every kind have been employed by the manufacturers of Moonbase to insure a cure for every conceivable medical emergency. This section is led by Dr. Helena Russell and Dr. Bob Mathias.

6. SECURITY

Responsible for monitoring areas which have restricted access to members of the base, as well as notifying command personnel of any possible threat to the well-being of the base either from within the Moon complex or from out in the space through which the Moon will Travel. Tony Verdeschi is First Officer in charge of defence and security in Command Center.

COMMAND CENTER

All of the above mentioned operating stations are controlled at Command Center, an influx of receiving stations where all Moonbase sections are monitored by their respective service officer. It is here under tight security where all command decisions originate. The commander's console is here as well as all master computer links, which govern the computerized base.

Why did Command Center move underground?

All facilities for Main Mission were moved deep underground for obvious reasons. First, in the event of an attack, all command personnel and equipment will be well protected. This also serves to keep Main Mission personnel isolated in times of extreme tension so that emotional stability can be boosted. New receiving stations were added to Main Mission, new consoles were added for new personnel with more efficient means to process information.

What powers the Eagle fleet?

The Eagles are powered by a small quantity of highly combustible fuel mixed with a radioactive core. The result is an enormous amount of thrust with little weight. This allows an Eagle to fly anywhere, even on a planet with strong gravity and atmosphere. These rockets are alternated with pure hydrogen compressed to within an inch of its life, giving a tremendous thrust without the danger of harming any life form on a planet's surface.

What do the colored marks on the uniforms mean?

The markings and patches on the uniforms serve a variety of functions. They identify rank and department, some have a small magnetic transmitter to allow certain individuals access to areas where others are forbidden to go. There are security clearance coded badges which are distributed at various times on a weekly basis whenever there is a major change in service command. Example: LSRO stands for Lunar Space Research Organization. (For a more detailed description of year II patches see the CON 79 program book)

How did the moon get out of our solar system?

The Moon was catapulted into a region of space that has never been studied before. All the planets lie in a straight plain, their orbits extend out from the Sun in concentric circles like rings drawn on a dinner plate. Until the time of the lunar accident, no one had ever sent a probe to the regions above or below the even plain in which all the planets lie. The Moon, driven by nuclear holocaust, is forced up and out of the plain of the planets and after traveling for almost a year becomes caught in a powerful warp in space of unknown origin.

There are three nuclear fusion reactors on Moonbase Alpha which supply enough power to run a major city. Fusion is a process by which elementary particles such as protons, neutrons, etc. are fused together under indescribable forces, resulting in an energy release similar to that of the Sun.

What's the average person like on Moonbase Alpha?

In order to have been assigned a position on Moonbase Alpha to begin with, the individual had to have been of exceptional mental and physical status. The average person on Moonbase Alpha holds a PHD or an equivalent scholastic degree in some field of research. Some individuals hold more than one doctorate in related subjects. An applicant for a position on Alpha could come from any nationality and must be recommended by four instructors. Once picked by a review board, the appointee undergoes two years of lunar status preparation training, and then six months training in his or her individual field.

How do they regenerate and reconstruct Eagles?

The Eagle is a completely modular vehicle. There is a vast underground repair and service complex strictly designed for the regeneration of space equipment. If a spacecraft should sustain some damage, it is immediately taken to the engineering repair and modification center. Technicians will then call from a computer file all parts necessary for a complete repair, and proceed to dismantle the craft. Alpha is capable of building completely new spacecraft with the aid of an atomic furnace and raw materials for metal which are taken from the crater left by the tragic nuclear explosion on September 13, 1999.

Why was Moonbase Alpha placed on the near side of the Moon?

The base was situated on the near side of the Moon because of the ease of transportation and communication. (if the base were placed on the far side of the Moon there could be no communication with Earth because the Earth would have been behind the Moon in radio silence) To probe deep space, the antenna and probe equipment were located on the far side of the Moon away from Earth radio noise. The information was transmitted around to Alpha and then radioed back to Earth.

What does COM-LOC mean and what exactly does it do?

COM-LOC stands for portable Communications Locking device. It is a handheld multi-functional device used by every member of the base. It has a wide range of 30 functions, but only 4 can be used at any one time, unless it is plugged into a desktop receiver which puts the COM-LOC in direct contact with the main computer. Otherwise the COM-LOC is in radio contact with the main computer and must divide up its functions into 4 parts. Apart from a logarithmic calculator, the COM-LOC opens most air pressure sealed bulkhead doors unless there is a prevailing security code. There is a two way audio-visual communications network in each device, although depending on the status of the individual, personal COM-LOCs have limitations. For instance, a worker in the nuclear plant would not be given free access to Command Center with his COM-LOC unless it was previously obtained by the proper higher ranking officer. A COM-LOC can process information, transmit information, and monitor controlled operations. On a limited scale, they are similar to the large data processing computers. Anyone on Alpha can be located instantly through a paging system in the main computer banks. The COM-LOC is also a Geiger counter, a thermometer, an air pressure gauge, a clock, and an infrared TV camera. (nail file and can opener not included).

(reprinted from the Space:1999 year II promotional handbook)

GREETINGS FROM

and best of luck to the INTERNATIONAL SPACE:1999 ALLIANCE's
CONVENTION '80

Less than a year old, the PRENTIS HANCOCK FANCLUB has quickly gained a reputation for dependable and interesting newsletters. Quarterly Communiqué brings you regular features such as:

- *Notes from the Diary--the Present (Written by Prentis)
- *10-years-ago--from the Actor's Diary
- *Lots of rare photos from Prentis' personal collection
- *Q&A (member questions answered by Prentis)
- *Scotland Yarns (stories & articles about Prentis' homeland)
- *Communiqués (member letters & comments)
- *Fan Fiction & Art
- *Notices & Ads (free to members)

Membership also includes an autographed membership card, biography and credits sheets, and a club binder with full color insert.

Join our international family and get to know a very talented, very interesting man.

Memberships are being accepted during Con '80 at the fan club table in the Dealers' Room. Please stop by for a visit.

THE PRENTIS HANCOCK FANCLUB

Member: NATIONAL ASSOCIATION OF FAN CLUBS
Designated Member: FAN CLUB ASSOCIATES

Mare Fitzgerald, Controller * 123 Fawn Valley Drive * McMurray, PA 15317 USA

The British NICK TATE Club

THE BRITISH NICK TATE CLUB is Nick's official international fan club and has his full approval and active interest.

Upon joining, new members receive a copy of our most recent newsletter, a large photo of Nick, a picture membership card, Nick's biography and career details, Alan Carters official biography, and all the current lists of photographs for sale. These lists include photos of Nick and of other Space:1999 regulars. Following this, members receive four newsletters per year, updates on photos for sale, and occasional surprises. On renewal, members receive a new photo and an updated membership card.

Our newsletter contains the latest information on Nick, both professionally and personally, messages from Nick, a chance to pose questions to Nick and have them answered by him personally in newsletters, a general science fiction news service, a pen-pal section, a chance to buy Space:1999 magazines, and assorted other goods. They also include Space:1999 stories and episode synopses, Space:1999 convention reports, articles by members such as encounters with Nick and reviews of his work etc.. We have art work covers, photo-copied picture pages of stills, prize competitions and other items of interest.

We hope you will join our club if you like Nick and his work or even if you're basically just a fan of Space:1999. In general, you'll find much to interest you because although we obviously put the emphasis on Nick and his career and personality, we feature Space:1999 strongly in each newsletter.

If you wish to join the club, we would like the following information to accompany your dues: Name, Full postal address, date of birth (day and month important, year optional). Please print all information clearly in block capital letters.

DUES:

U.K. & EIRE: £2.00

EUROPE: £2.50

ELSEWHERE: \$7.00 or Equiv.

PLEASE MAIL INFORMATION & DUES TO:

EILEEN SKIDMORE & PHYL PROCTOR
69 FRANCIS ROAD, ACOCKS GREEN
BIRMINGHAM, B27 6LT, ENGLAND

METHODS OF PAYMENT: Please pay using one of the following methods only.

- 1.) US DOLLAR BILLS & all other overseas currency accepted if paid in paper money
Note: we can not accept coins
- 2.) Check or bank draft made payable in British pounds and pence. Your bank will do this for you.
- 3.) International Money Order available from post-offices & also made out in British currency.

IF YOU REQUIRE FURTHER INFORMATION ABOUT THE CLUB, PLEASE ENCLOSE 2 INTERNATIONAL REPLY COUPONS TO BE EXCHANGED FOR STAMPS FOR A REPLY. (POST OFFICE) THANKS

U.S. EAST COAST CONTROL

If you enjoyed the Gerry Anderson series "UFO", then SHADO* USECC is for you. The club has only been in existence since April 1979 and is already one of the most enjoyable fan clubs for that series.

For the yearly dues of \$6.00, each member is entitled to 12 issues of the club newsletter, membership card and membership package, which consists of related merchandise such as photos and other items.

The club newsletter is from 4-8 pages per issue and features regular columns, club news, episode synopses and credits, technical drawings and profiles, photos and more.

If you are interested in joining this fast growing organization, send your \$6.00 check or money order to SHADO*USECC, C/O Jim Main / 121 Railroad St. / New Milford, Ct 06776

Checks and money orders should be made out to Jim Main

COMMANDER STRAKER WANTS YOU! JOIN TODAY! SHADO LIVES!

the Prisoner

The Green Dome is a magazine for "Prisoner" enthusiasts. It contains news & discussion of this phenomenal TV series. Also included: LoC column called "Free for All", "Secret Agent" synopses, contests, artwork, fandom information and MORE. Of course, Patrick McGoochan, creator and star, remains in the lime-light. Published quarterly and available world-wide. Join us and perhaps this zine will prove as thought-provoking (or just plain provoking) as the show itself!

NEW CHICAGO TRIBUNE, THE ONLY "BUCK ROGERS IN THE 25th CENTURY" CENTERED FAN CLUB CURRENTLY OPERATIONAL.

NCT IS PRIMARILY A "BUCK ROGERS" FAN CLUB, BUT IT WILL FEATURE REPORTS ON OTHER SCI-FI PROJECTS, PAST, PRESENT, AND FUTURE. ABOUT THE CLUBS NEWSLETTER "WHAT'S UP, BUCK?": IT WILL FEATURE MANY INTERESTING AND INFORMATIVE ARTICLES, REVIEWS AND ALWAYS SURPRISES. THERE WILL BE STAR BIO'S, ORIGINAL ARTWORK (NCT HAS SECURED THE SERVICES OF ROSE MARIE BADGETT, AUTHOR OF "A SPACE: 1999 TRILOGY", AND ONE OF

FANDOMS MOST TALENTED ARTIST), SHORT STORIES, AND MORE.

ISSUE ONE CONTAINED A NCT EXCLUSIVE, "THE FIRST BUCK ROGERS STORY EVER PUBLISHED" (ARMAGEDDON), WHICH HAS ONLY BEEN USED THREE TIMES IN PUBLISHING HISTORY. PUZZLES, REVIEWS, AND MUCH MUCH MORE!

ISSUE TWO CONTAINED TWO ORIGINAL BUCK STORIES, ARTWORK, PHOTO'S AND MUCH, MUCH MORE!

ISSUE THREE WILL CONTAIN: THE FINISHED STORY TO ISSUE ONE'S "FINISH THE STORY" CONTEST (WINNER: MARE G. FITZGERALD), THE FIRST DEFINITIVE "SPACE: 1999" ARTICLE IN YEARS (A TRIBUTE TO CON '80), PLUS AN ORIGINAL "1999" STORY, PUZZLES, COMPLETE CONVENTION COVERAGE, NO WAITING FOR TWO ISSUES, PLUS THE BEGINNING OF A SPECIAL SERIES, A TRIBUTE TO ALFRED HITCHCOCK. ALSO WE WILL CONTINUE OUR COVERAGE OF "GALACTICA: 1980" WITH "GALACTICA: 1980, WHAT WENT WRONG?". ALSO, BEGINNING IN ISSUE THREE WILL BE THE PREMIERE OF A NEW COLUMN CALLED "THE NEWS". ISSUE THREE WILL BE AVAILABLE AFTER SEPTEMBER 1, 1980. THIS WILL ALSO BE ONE OF THE LARGEST FANZINES PRODUCED ON A REGULAR BASIS, ABOUT 50 PAGES IN LENGTH.

MEMBERSHIP FEE'S ARE AS FOLLOWS: FOR \$5.00 YOU WILL RECEIVE 4 ISSUES OF "WHAT'S UP, BUCK?". SINGLE ISSUES ARE \$1.50. ISSUES ONE AND TWO ARE AS OF THIS DATE 2.00 A PIECE. AFTER CON '80 BOTH ISSUES WILL NO LONGER BE AVAILABLE. ALSO MEMBERS WILL RECEIVE MEMBERSHIP CARDS AND OCCASIONAL SUPPLEMENTS. ISSUES ARE MAILED FLAT.

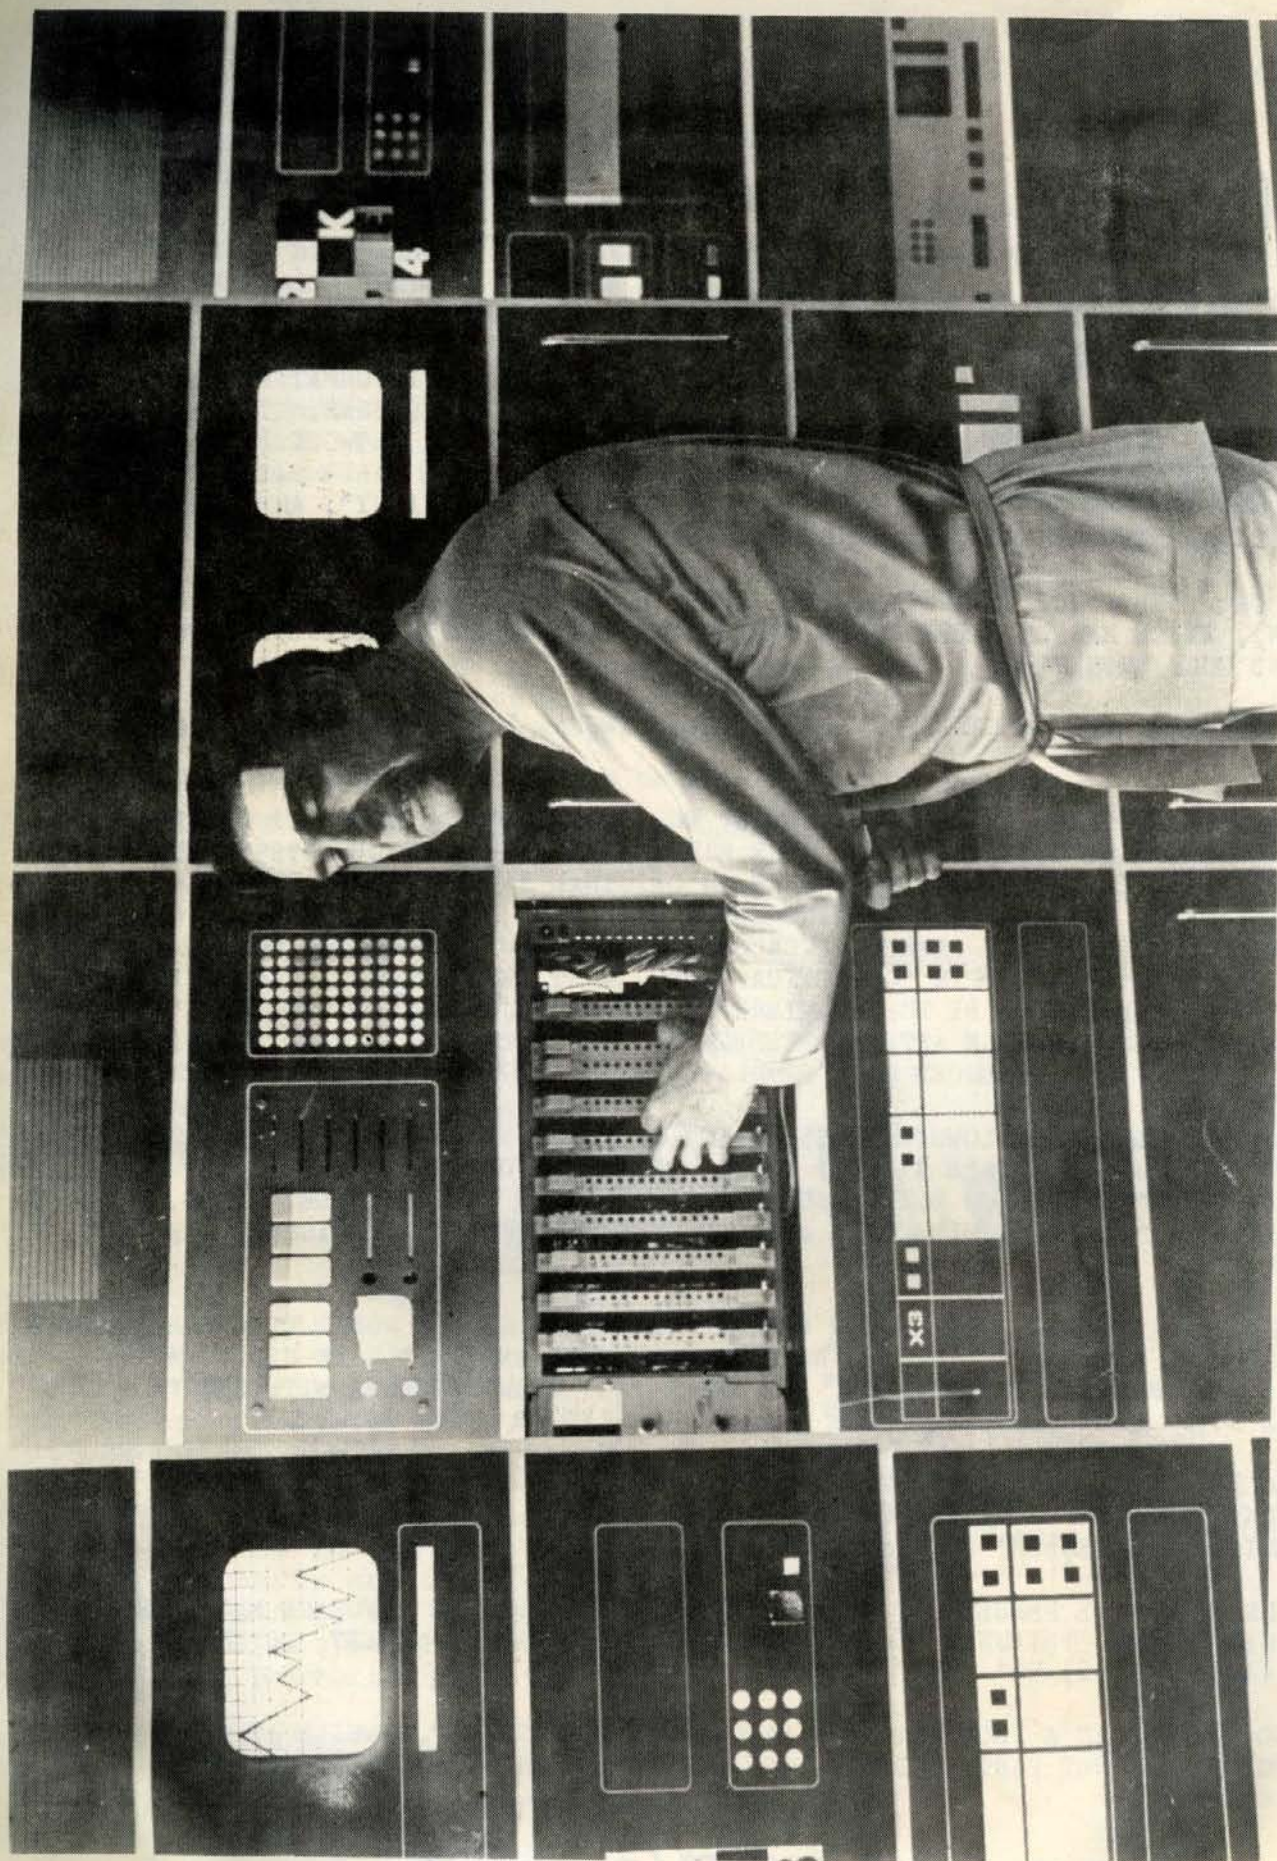

WE HOPE YOU WILL CONSIDER JOINING NEW CHICAGO TRIBUNE. IF YOU WOULD LIKE MORE INFO WE WILL HAVE A TABLE AT THIS YEARS CON, COME OVER AND TALK WITH US, THERE WILL ALWAYS BE SOMEBODY AT OUR TABLE. WE ARE A FAST GROWING CLUB, WITH ACTIVE MEMBERS AND STAFF (NCT HAS ONE OF THE LARGEST NEWSLETTER STAFF ANYWHERE).

NEW CHICAGO TRIBUNE IS A MEMBER OF:
NATIONAL ASSOCIATION OF FAN CLUBS AND
A "DESIGNATED MEMBER" OF FAN CLUB ASSOCIATES.

FOR THOSE UNABLE TO BE PRESENT AT CON THE ADDRESS FOR FURTHER INFO AND MEMBERSHIP FORM IS: NEW CHICAGO TRIBUNE, c/o DARRYL RILEY, 613 GARRARD STREET, COVINGTON, KENTUCKY 41011. (606) 581-4994.

NEW CHICAGO TRIBUNE IS A PRODUCTION OF "MOONBASE PRODUCTIONS". WHILE AT CON BE SURE TO DROP BY THE NCT PARTY WHICH IS SCHEDULED FOR SATURDAY AFTERNOON. EVERYONE IS WELCOME!

NEW CHICAGO Tribune

I KNOW THE ASPIRIN IS HERE SOMEWHERE!

THE

INTERNATIONAL

SPACE:1999 ALLIANCE

Dedicates this book to the cast and crew of Space:1999 for the joy they have given us as we watched the show and for the creation of the spirit which causes us to come together each year to renew our faith in the show and in each other.
